

I had a wonderful experience with the summer course. The lectures provided by the professors were engaging and informative. Regarding the history lectures, I was able to learn not only a breadth but also a depth of material in an extremely short amount of time. I also greatly enjoyed the culture classes as well, especially as they focused on literature. I think that oftentimes literature is overlooked in brief culture classes, so it was fantastic to be able to read a variety of Hungarian poets and learn about what influenced them.

I'm grateful to have been given the opportunity to take the online course, and would recommend it to others.

All the best.
Joie Meier
